

Please check the examination details below before entering your candidate information

Candidate surname		Other names	
Pearson Edexcel International Advanced Level		Centre Number 	Candidate Number
Time 1 hours 30 minutes		Paper reference	WFM03/01
▲ ▲ Mathematics International Advanced Subsidiary/Advanced Level Further Pure Mathematics F3			
You must have: Mathematical Formulae and Statistical Tables (Yellow), calculator			Total Marks

Candidates may use any calculator permitted by Pearson regulations. Calculators must not have the facility for symbolic algebra manipulation, differentiation and integration, or have retrievable mathematical formulae stored in them.

Instructions

- Use **black** ink or ball-point pen.
- If pencil is used for diagrams/sketches/graphs it must be dark (HB or B).
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions and ensure that your answers to parts of questions are clearly labelled.
- Answer the questions in the spaces provided
– *there may be more space than you need.*
- You should show sufficient working to make your methods clear. Answers without working may not gain full credit.
- Inexact answers should be given to three significant figures unless otherwise stated.

Information

- A booklet 'Mathematical Formulae and Statistical Tables' is provided.
- There are 8 questions in this question paper. The total mark for this paper is 75.
- The marks for each question are shown in brackets
– *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.
- If you change your mind about an answer, cross it out and put your new answer and any working underneath.
- Good luck with your examination.

Turn over ►

$$1 - \tanh^2 x \equiv \operatorname{sech}^2 x \quad (3)$$

(b) Solve the equation

$$2 \operatorname{sech}^2 x + 3 \tanh x = 3$$

giving your answer as an exact logarithm. (3)

Q1

(Total 6 marks)

$$y = \sqrt{9 - x^2} \quad 0 \leq x \leq 3$$

- The curve is rotated through 2π radians about the x -axis.

- (b) Using calculus, find the exact area of the surface generated. (3)

Question 2 continued
